

## Managing contractor appointed

Property giant Brookfield Multiplex has been appointed as the managing contractor for the Stage One contract for design and construction of the \$1.76 billion Fiona Stanley Hospital at Murdoch.

Health Minister Dr Kim Hames said Brookfield Multiplex was well positioned to lead the design and construction of the new tertiary hospital - the biggest building project ever undertaken by the State Government.

“Brookfield Multiplex has a reputation for delivering quality, innovative and successful major infrastructure projects, including many within the health sector,” Dr Hames said.

Brookfield Multiplex’s experience includes the construction of 25 hospitals including:

- Greater Peterborough Hospital, United Kingdom
- Casey Hospital, Berwick, Victoria
- Broadmeadows Health Service, Broadmeadows, Victoria
- Royal Melbourne Hospital, Parkville, Victoria
- Prince Charles Hospital redevelopment, Chermside, Queensland
- Royal Brisbane Hospital, Herston, Queensland
- Waitekere Hospital, New Zealand.

Locally, Brookfield Multiplex has worked on the St John of God Hospital Murdoch and the Queen Elizabeth II Medical Centre, along with the \$195 million District Court Building, the \$225 million Perth Convention Exhibition Centre and the \$600 million City Square development in Perth’s CBD.

The Minister said the appointment of the project’s managing contractor was another major milestone in the delivery of the new southern metropolitan tertiary hospital.

“The hospital design is well progressed, and site clearing and bulk earthworks are complete in readiness for the start of construction of the main hospital buildings within the coming months,” he said.

Brookfield Multiplex Regional Managing Director - Constructions John Flecker said the company was pleased to be involved in the hospital’s development.

“Fiona Stanley Hospital is set to become one of the best hospitals in the country - we’re looking forward to being a part of that,” Mr Flecker said.

Site works for the Fiona Stanley Hospital have been completed in preparation for construction of the main hospital buildings to begin in mid 2009. Completion is expected in late 2013. [... read more](#)
